

ABSTRACT

5 A printhead assembly is provided comprising at least one printhead module comprising at least two
printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the
surface of print media, a support member supporting and carrying the printing fluid for the at least two
10 printhead integrated circuits, and an electrical connector for connecting electrical signals to the at least two
printhead integrated circuits, drive electronics incorporating at least one controller for controlling the printing
operation of at least one of the at least two printhead integrated circuits, a plurality of longitudinally extending
electrical conductors arranged to provide power from a power supply to the drive electronics and the at least
10 two printhead integrated circuits, and a casing in which the at least one printhead module, the drive electronics
and the plurality of electrical conductors are removably mounted.
